Harumi Wanasita

Broad autonomy and financial balance more equitable, proportionate and transparent inter-governmental level to be one area and community demands. Under Law No. 33 of 2004 on Fiscal Balance between Central and Regional Government stated that in order for the household itself can be best then to have to be given enough financial sources, but remember that not all sources of financing can be given to areas with the head region required to dig up all their own financial resources based on legislation and regulations.

The problems in this research is the contribution of local taxes and levies on PAD Lampung Tengah District is still relatively small, and the average contribution of PAD Lampung Tengah District ranks third smallest of the 10 districts in Lampung province after Tulang Bawang district. The purpose of this study is to determine the performance of each of the sources of original income (PAD) Lampung Tengah District budget year 2003-2008.

Research results showed Achieving Revenue Targets Lampung Tengah District PAD other revenue component has the highest target attainment, whereas retribution and operating income areas have lower achievement. Postal receipts etc. contributed to total revenue receipts largest and retribution has the smallest contribution. The highest average growth of postal charges contained in the health service and the lowest position on parking levy growth. Levy health services became a source of revenue with the ability of receiving a very good performance in Lampung Tengah District. Performance of local revenue sources the original income (PAD) Lampung Tengah District is still not optimal, especially the revenue comes from advertisement tax, and tax group minerals C.
